Subject : HQSonics products and WesDyne Sweden

Dear customers,

Since we started the company in 2003 HQSonics has become a worldwide supplier of ultrasonic probes for Non-Destructive Testing (NDT). The mission of HQSonics has always been to provide safe and environmental friendly NDT solutions and to obtain maximum customer satisfaction by innovation, quality, flexibility and support.

In the future we believe this mission and the associated values will be reinforced by transferring our probe products and deliveries, with related technical know-how, to WesDyne Sweden AB; a market leading supplier of Non-Destructive Testing products and services, including advanced ultrasonic and eddy current probes.

HQSonics BV has initiated the transition, to WesDyne Sweden, of design and manufacturing of all our advanced customized probes for the NDT industry. WesDyne Sweden's experience and capabilities within NDT probe design and manufacturing will ensure continued availability of and support for HQSonics products.

Please contact Mr. Lars Skoglund at WesDyne Sweden if you have enquiries about products and services.

Mr. Lars Skoglund
Phone: +46 (0)732 32 81 34
E-mail: skoglule@westinghouse.com

Learn more about WesDyne's expertise and capabilities here: <https://www.wesdyne.se/>

Mr. Huynen will continue to support the products and advise and support WesDyne for design and manufacturing for the foreseen future.

HQSonics will continue to develop and advance its mission within the NDT area to obtain maximum customer satisfaction.

Best Regards,

HQSonics bv, Ir. Henk H.J. Huynen
